

# EcoCycle by Crossville

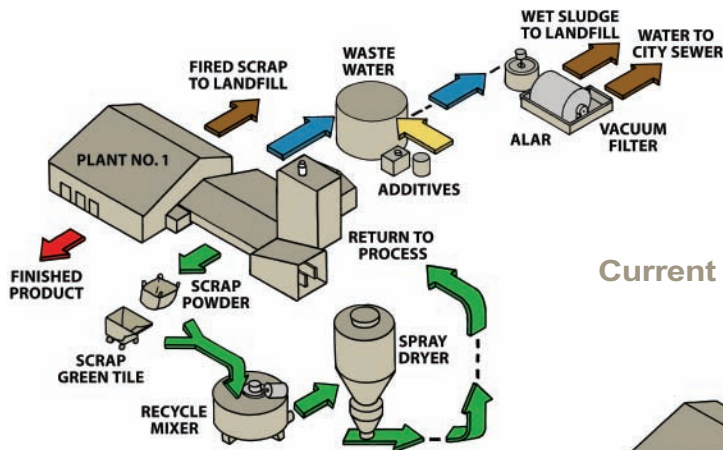

## A Beautifully Green Alternative

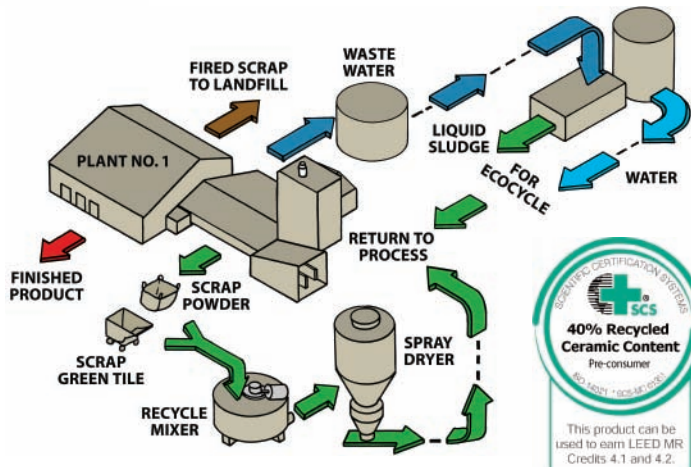

The recycled content of all EcoCycle products has been verified by Scientific Certification Systems (SCS), an independent certifier of environmental claims. The eight products in the EcoCycle series have a certified recycled content of 40 percent. According to ISO 14021 on "Environmental Labels and Declarations" as well as the USGBC's "LEED® 2.2 Rating System for New Construction," pre-consumer recycled material is defined as material diverted from the waste stream during or from the manufacturing process. At Crossville, approximately 5 million pounds of fine particulate waste material that was previously landfilled each year is now recovered through a sophisticated wastewater reclamation system.

### Former Waste Management Processes

### Current Waste Management Processes

### Product Features

- 40 percent certified recycled content
- The only porcelain tile with a certified recycled content
- Certified by Scientific Certification Systems
- Environmentally responsible
- Contributes to LEED certification of a project
- Slip resistant and easy to clean
- Ease of maintenance—No sealing or waxes required
