CROSSVILLEINC.COM

Welcome to Crossville, Inc.

*We love partnering with designers like you for one simple reason:
what inspires you, inspires us.*

CREATIVE SOLUTIONS FOR EVERY PROJECT

For more than 30 years, designers and architects, retailers, and specifiers have looked to Crossville for creative solutions. This catalog will familiarize you with our products, services, and complimentary samples. Finding your next inspiration isn't always obvious, but finding the right partner should be.

HIGHEST STANDARDS FROM THE INSIDE OUT

Crossville is a subsidiary of The Curran Group, a family-owned, privately held corporation. We run on the same principles that the Currans are known for in all their business endeavors: family, partnership, integrity, improvement, and respect. Get to know us, and you'll find that our unique value system guides our relationships with employees, business associates, and with you, our customers.

FAMILY OWNED AND DESIGNED IN THE U.S.

As America's first manufacturer of large format porcelain tile, Crossville brings a history of innovation to clients who expect the highest standards inside and out. In fact, a majority of our tile is made here in the United States. As a subsidiary of The Curran Group we remain true to core values of family, partnership, integrity, improvement, and respect.

DESIGN TOOLS

Planning and visualization tools for designers and architects are available on [CrossvilleInc.com/Resources/Tile-101](https://www.crossvilleinc.com/Resources/Tile-101).

FLOOR PATTERNS

Explore nearly 100 floor tile patterns with suggested tile sizes and collections for each.

SELECTING A GROUT

Find the best grout types and colors to complete your tile design.

GET PLANKED

Request your favorite tile in popular plank sizing
(most Crossville collections are eligible, see page 7).

MOSAIC BUILDER

Choose from nearly endless combinations of Crossville glass tile colors and sizes to design custom mosaic for walls, floors, and more.

CROSS-VISION®

Create, save, and print visualizations of paint and flooring combinations, either within stock Crossville environments or via your own uploaded images. Visit our visualizer tools at [CrossvilleInc.com/Design-Inspiration/Design-Visualizers](https://www.crossvilleinc.com/Design-Inspiration/Design-Visualizers).

NATIONAL ACCOUNTS

Clients working on national, multi-location projects face unique challenges and need a partner with the ability to meet their requirements across large geographical areas, ensuring every site consistently receives high quality material on time. That's where the Crossville National Account Team steps in. With extensive experience in the retail, automotive, quick-serve restaurant, convenience, and hospitality segments, our in-house National Accounts Team has what it takes to manage supply chain needs. They provide expert materials forecasting, sales support, order processing, and inventory management.

Contact a National Accounts representative at **(931) 484-2110** to learn more about the following:

- Dedicated customer focus with more than 26 years of service to commercial development.
- State-of-the-art logistics to ensure major market delivery 2-3 times per week.
- Special pricing programs to assist with cost-control needs.
- Expert materials forecasting, sales support, order processing, and inventory management.
- Extended product warranties and custom designs for more creative freedom.

GSA ADVANTAGE

Quality Crossville products are available at GSA pricing

Designing for government projects? Our extensive line of award-winning Porcelain Stone floor and wall tile, and our line of accent tiles, is available to government customers at GSA pricing.

Fast delivery

Centrally located in Crossville, Tennessee, we have an industry-leading logistics system to ensure you get your tile when and where you need it, on time and on budget.

On contract

Our GSA contract number is GS-07F-0429 and the TXMAS contract number is TXMAS-5-0560.
Our products may also be purchased on state contracts.

Special Services

CROSSVILLEINC.COM

ORDERING SAMPLES

Order complimentary samples in the color of your preference at **CrossvilleInc.com**.

OTHER SPECIAL SERVICES INCLUDE:

- Loose samples are free for architects and designers. See back cover for details.
- Chip kits are available through your local distributor.
- Custom patterns using 3x3 mosaics may be ordered through your local distributor; please allow adequate lead time.
- Crosstyle® provides custom cutting of any Crossville Porcelain Stone tile into any geometric, straight-edged piece 2x2 or larger.
- Crossville now offers each of its Porcelain Stone products in popular plank shapes, with no minimum order and quick order fulfillment (most Crossville collections are eligible).
- Given the extreme hardness and durability of Crossville Porcelain Stone, cutting the tile or drilling holes requires specific blades and drill bits. Go to CrossvilleInc.com, and visit the Resources/Installation Guide section for our cutting and core drilling guides.
- Crossville offers an online booklet of pattern layout designs called the "Pattern Book." Contact your local distributor or visit Crossville's website at CrossvilleInc.com.
- Crossville offers custom color service. Minimum order requirement and special set-up fees apply.
- Crossville offers Cross-Grid®, a process that grinds all four sides of our Porcelain Stone tiles. This squaring is also called rectified, and it allows the tile to be installed with narrower grout joints.
- Crossville's website offers a variety of additional tools and information valuable to both professionals and homeowners.

††† 4x4 hex for light-duty horizontal use in residential applications only.

Get Planked® Program

NEED IT IN PLANKS?

Found the perfect tile, but need it in planks?

Crossville now offers each of its Porcelain Stone products in popular plank shapes. With no minimum order and quick order fulfillment, you'll be seeing planks in no time.

Depending on the product selected there are 4 possible widths and 7 possible lengths, which add up to more than 2,596 shape combinations.

Many of Crossville's tiles are now available in the much-requested Half-Plank size (square tile cut in half). For the latest information about half-planked tile, please visit CrossvilleInc.com or phone: 931.484.2110

Wall: **Main Street** | AV214 Gallery Grey | AV215 Boutique Black

Wet DCOF/Safety Considerations

DCOF ACUTESTSM

The Wet DCOF AcuTestSM is the new standard for accurately determining the actual coefficient of friction on a tile surface. Developed by the Tile Council of North America (TCNA), the Wet DCOF (Dynamic Coefficient of Friction) AcuTest is a repeatable, reproducible method of measuring DCOF. This method uses a specifically engineered device to perform the required testing, ensuring the most precise results. The Wet DCOF AcuTest is included in the latest version of ANSI A137.1 Specifications for Ceramic Tile.

SAFETY CONSIDERATIONS FOR TILE

- In areas where standing water may occur, selected tile should have an elevated DCOF rating. Please refer to the “Tile Performance Data” page for additional information.
- Polished tile should not be used in areas where standing water, oil, or grease may be present due to the tile’s low coefficient of friction.
- Pool deck tiles, whether interior or exterior, should have a surface texture that provides an elevated DCOF rating. Please refer to the “Tile Performance Data” page for additional information.
- Ramps or inclines should have an increased DCOF.
- There are no tiles that are slip proof, only slip resistant.

The Tile Council of North America (TCNA), established in 1945, has a leadership role in promoting the use of ceramic tile and in developing North American and international industry standards. To learn more about TCNA, please go to tcnatile.com.

The defining threshold value is 0.42 for level interior spaces expected to be walked upon when wet, a wet DCOF of less than 0.42 shall only be installed when the surface will be kept dry when walked upon and proper safety procedures will be applied when cleaning the tiles.

Finishing, Coating, and Cladding

CROSS-SHEEN®

- Protect tile from stains, scuffs, and graffiti
- Integrated invisible finish that requires only a mild cleaner for hassle-free maintenance.
- Applicable to exterior and interior walls as well as interior flooring for commercial or residential.
- Exclusively from Crossville and made in the U.S. to stringent specifications
- Visit us online for usage of Cross-Sheen in the redesign of DeAnza High School, Ashland Youth Center, and others.

HYDROTECT™ COATING

- Revolutionary invisible coating self-cleans exteriors against dirt, grime, algae, and pollution.
- Applicable to floors and walls, indoors and outside.
- No toxic chemicals needed to maintain that Day 1 look for years to come.
- Purifies exterior air by reducing greenhouse gases, environmental pollutants, and volatile organic compounds in the presence of UV light.
- A 10,000-square-foot area of tiles can clean the air as effectively as 70 poplar trees or green space the size of four tennis courts.

To learn more about Cross-Sheen and Hydrotect visit CrossvilleInc.com/Resources/Tile-101/Finishes-Coatings.

EXTERIOR CLADDING

- Offers both aesthetic appeal and structural functionality.
- Graffiti resistant and appropriate for all kinds of environments.
- Engineered for utility savings due to thermal mass advantages.
- Contact us at crossc@crossvilleinc.com to learn more.

Sustainability

RECYCLED CONTENT

At Crossville, sustainability is at the heart of all that we do. Our products contain recycled content that is a mix of material from our own manufacturing processes, previously fired tile, and post-manufactured waste from other sources. The amount and source of our recycled material varies by production run in an effort to reduce overall environmental impact. For this reason, we are no longer reporting minimum recycled content by series.

As part of our contribution to LEED V4 & V4.1 projects, we ask that you use Crossville's other applicable resources, including EPD's, HPD's, Declare Labels, Green Squared, and more found here

www.crossvilleinc.com/Resources/Sustainability

RECYCLED PRODUCTS

Crossville recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. In addition to its own fired waste recycling, Crossville also accepts and recycles reclaimed, previously installed tile through its Tile Take-Back™ Program. For more information, visit CrossvilleInc.com/green.

TILE TAKE-BACK® PROGRAM

With our Tile Take-Back Program, Crossville, the tile industry's leader in sustainable initiatives, solves the major environmental problem facing the tile industry today: recycling fired tile.

Previously, pre and post-consumer tile has been considered non-recyclable. While many tile manufacturers, including Crossville, have successfully reused scrap powders and unfired tile, hundreds of millions of pounds of damaged or otherwise unsellable fired tile (tile in its finished state), have gone to landfills each year. Additionally, there has been no environmentally friendly manner to dispose of previously installed tile.

We have developed a proprietary system of processing porcelain tile back into powder used in manufacturing new tile. The resulting new products will have a verifiable recycled content, and more than 4 million pounds of tile that Crossville previously sent to local landfills will be recycled. This is in addition to any tile Crossville will receive through our ground-breaking Tile Take-Back Program. Not only will the new process allow Crossville to repurpose its own scrap tile, but will allow the company to take back samples and previously installed tile, always a concern for environmentally-minded designers and building owners.

LIVING PRODUCT CHALLENGE

As Crossville re-invigorates new lines, we strive to make them as environmentally friendly as possible. For this reason, we have partnered with the International Living Future Institute for the Living Product Challenge.

Using the Living Product Challenge framework, consumers can choose products that are healthy and free of toxins, know that manufacturers are socially responsible and respect the rights of workers, and that benefit both people and the environment.

Crossville is choosing to certify new products as part of a commitment to a healthy world by following the standards set for in the Living Product Challenge. Retro Active 2.0 has been awarded petals for Place, Water, and Beauty. Our newest 2.0 products - Shades 2.0 and Color Blox 2.0 - are currently in review.

Please refer to CrossvilleInc.com for product information. For more information on the Living Product Challenge visit www.living-future.org/lpc

Sustainability

SUSTAINABLE OPERATIONAL PROCEDURES

In order to minimize our impact on the environment, Crossville's sustainable operational procedures include:

- Printing of marketing materials at Forestry Stewardship Council certified facilities; use of soy inks and recycled paper whenever possible.
- Packaging of samples, merchandising materials, and piece goods with recycled/recyclable wrapping and cushioning.
- Company-wide recycling program for all office and production facility paper waste.

GREEN SQUAREDSM CERTIFICATION

The standard in sustainability for the tile industry in North America is ANSI A138.1. Crossville was among the first manufacturers to achieve Green SquaredSM certification for its entire U.S. manufactured porcelain tile product line-up, which is manufactured in Crossville, TN, as well as its production processes. Green Squared is the stringent and powerful measure for tile industry sustainability developed by Tile Council of North America under the American National Standards Institute (ANSI) process.

Green SquaredSM

- Evaluates products and processes in five key environmental and social categories:
 - Product characteristics
 - Manufacturing operations
 - Corporate governance
 - Innovation
 - End-of-life product management
- Recognizes manufacturers for leadership in environmental stewardship and corporate responsibility.
- Serves as the standard bearer to ensure transparent, full disclosure of sustainability product, manufacturer by manufacturer industry wide.

ECOCYCLE TILE PROCESSTM

Through the EcoCycle Tile ProcessTM, Crossville recycles millions of pounds of tile waste each year that would otherwise be sent to landfills. The two-pronged, proprietary process addresses the recycling of fired tile and filtrate waste. It's a major contributor to Crossville's status as a net consumer of waste (the company consumes more waste than it send to landfills)—a distinction that no other domestic tile manufacturer has yet to achieve.

Recommended Use

Cross-Colors (UPS) is recommended for interior floors, walls, countertops, and exterior walls in both commercial and residential applications. Cross-Colors (PO) is recommended for interior floors (except where standing water may occur), walls, countertops and exterior walls in both residential and commercial environments.

See CrossvilleInc.com for detailed installation instructions.

12 x 12

8 x 8

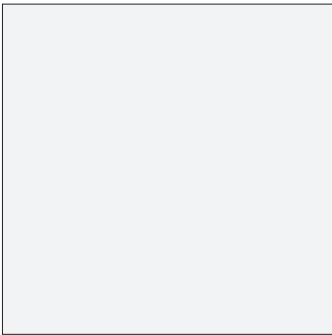

6 x 6

Finishes and Textures

Crossville offers designers, architects, and builders the utilitarian textures to answer the specific needs of those areas with the highest exposure. These textures are an integral part of the tile and cannot be worn down. No matter how technical the specifications, we have a surface that is highly functional, yet able to blend beautifully with any design application. Please refer to the Tile Performance Data chart in the back of this catalog for actual tile performance details.

Unpolished (UPS)

Cross-Sheen finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen finish is appropriate high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

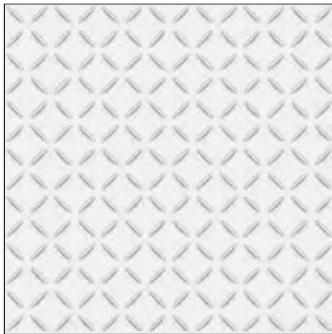

Polished (PO)

Polished Porcelain Stone is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Cross-Slate® (CS)

The Cross-Slate finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

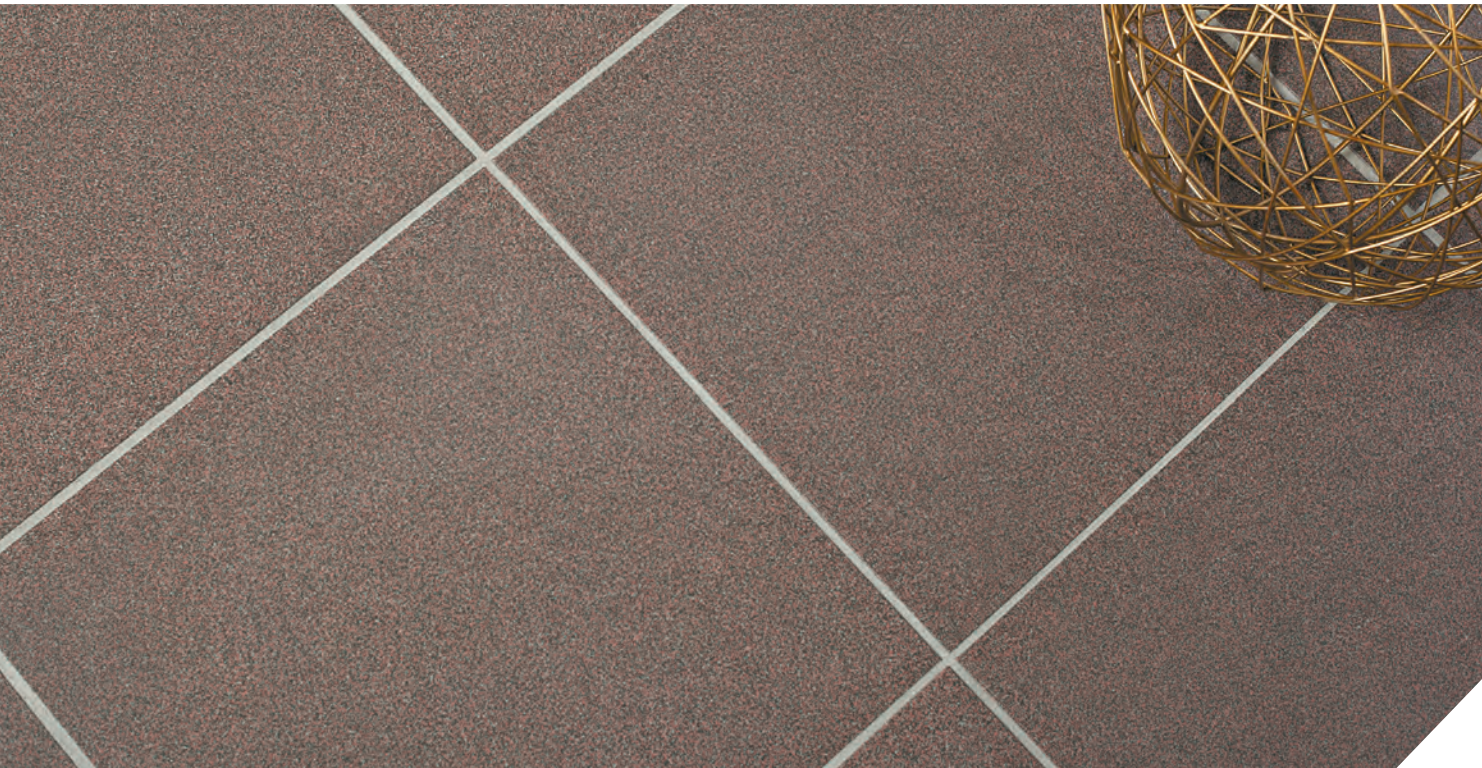

Cross-Tread® (CTS)

Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Wet DCOF			
Unpolished	(UPS)	Cross-Tread®	(CTS)*
0.50 – 0.60		0.50 – 0.60	
Polished	(PO)	Cross-Slate®	(CS)
0.31 – 0.41		0.50 – 0.60	

*The increased real world traction of these types of surfaces cannot be fully realized by our current DCOF testing methodologies due to their exaggerated facial structure.

EcoCycle Americana®

- Competitively priced for exceptional value
- Deep hues go all the way through the tile, making the body an integral part of the overall color
- Recommended grout joint: 3/16"
- Field Tile - Calibrated
- Cross-Sheen Finish for easy cleaning (UPS only)
- Rounded edges allow for a smoother transition

FIELD TILE

	Nominal (in)	Actual (mm)	Thickness (mm)	Grout Joint (mm)	Finish
2" Square*	2 x 2	47.5 x 47.5	6	2.6	Gloss/Matte
2" Hex**	2 x 2	47.5 x 47.5	6	2.6	Gloss/Matte
3/4" Penny Round***	0.75 (diameter)	19 (diameter)	6	2.0	Gloss/Matte

* 2" Square is mounted on a 301 x 301 sheet.

** 2" Hex is mounted on a 272 x 326 sheet.

*** 3/4" Penny Round is mounted on a 292 x 324 sheet.

† 2" Hex tile measures 47.5mm from one straight edge to the opposing parallel edge.

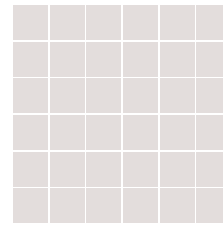

Recommended Use*

Multiplier tile is recommended for Interior Floors Dry, Interior Walls Dry, Interior Walls Wet, Exterior Walls, Exterior Covered Walls, Pool/Fountain Lining, Waterline Pool/Fountain, Countertops in residential and commercial applications.

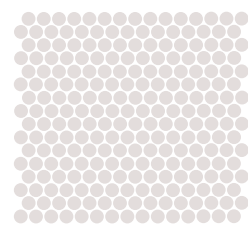

* The tile applications featured in this publication are for illustration purposes only and are not intended as a representation or warranty of the suitability of Crossville Tile for any particular application. Specifically, tile selection for wet applications (such as shower or bathroom floors) requires careful consideration of the unique nature of the design and installation. For instance, the industry standard for tile used on level interior surfaces is a dynamic coefficient of friction (DCOF) value of 0.42 or greater; however, the use of small (2" or less) mosaics with lower DCOF values may nonetheless be acceptable for projects with an increased number of grout joints, along with the presence of other surface structures that provide both traction and a means for water to drain and dissipate from the area. It is the sole responsibility of each end user to consult with a design professional to determine and select the most suitable flooring for a particular project.

See CrossvilleInc.com for detailed installation instructions.

State of Grace UPS is recommended for interior floors, walls, countertops, and exterior walls in both residential and commercial applications. The satin finish is recommended for residential and light commercial use only. State of Grace is not recommended for exterior horizontal surfaces or exterior paving. **The satin finish is not recommended for wet areas where standing water may occur. If offset pattern is required for tiles 15 inches or longer, Crossville recommended an offset of not greater than 33%.**

See CrossvilleInc.com for detailed installation instructions.

* Mesh mounted

** Sold as loose pieces

*** Linear Mosaic consists of 15 x 98, 23 x 148, and 38 x 148 tiles

Recommended Use

Yin + Yang natural stone is recommended for interior and exterior walls. It is recommended for dry interior floors. Yin + Yang is not suitable for the lining of pools, fountains, or spas. This natural stone displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure optimum installation.

Care and Maintenance

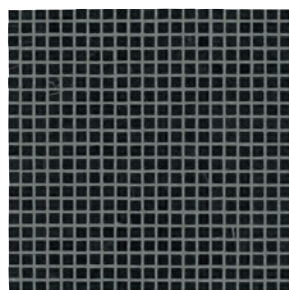

For complete care and maintenance information of stone products, the Marble Institute of America provides extensive information on their website, marbleinstitute.com/consumers/care.cfm.
Phone (440) 250-9222.

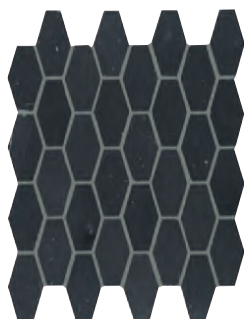

Natural Stone Yin + Yang

Recommended Use

Sideview Glass tile can be used for interior walls in wet or dry applications.

Cleaning

Regular cleaning is the best way to keep Sideview Glass tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville products is available at CrossvilleInc.com.

In-Side

Inspired by Pietra del Cardoso, a deep-blue grey sandstone mined only in the Apuan Alps, In-Side combines the mixture of natural raw materials with variable grain sizes, resulting in a textural, blended material that is typical of natural stone. In fact, the continuity of the material through-and-through makes the collection an important new tool in the hands of interior designers: even after being cut, drilled and chamfered during production, the body and surface of the material still share the same appearance

Ossido

Big gets bold with Crossville's Ossido porcelain tile panels by Laminam. Each panel evokes the look of materials left to weather and oxidize, capturing the perfect moment of nature's transformation in porcelain. From verdigris copper to weathered steel, each 1m x 3m panel is packed with personality and visual texture that will never corrode or transfer like the materials that inspired it. This true merger between art and the best in ceramics technology offers a new, rich palette of everlasting style for designers and architects alike. Stocked in 5.6mm for floors, walls, and counters, Ossido is also available in 3+ for walls through special order.

Oxide

Oxide collection evokes metal that has reacted to sunlight and has been exposed to the weather over time. This collection was devised to embellish settings with character, which has surprisingly become the solution for a total look.

Tile-Over-Tile

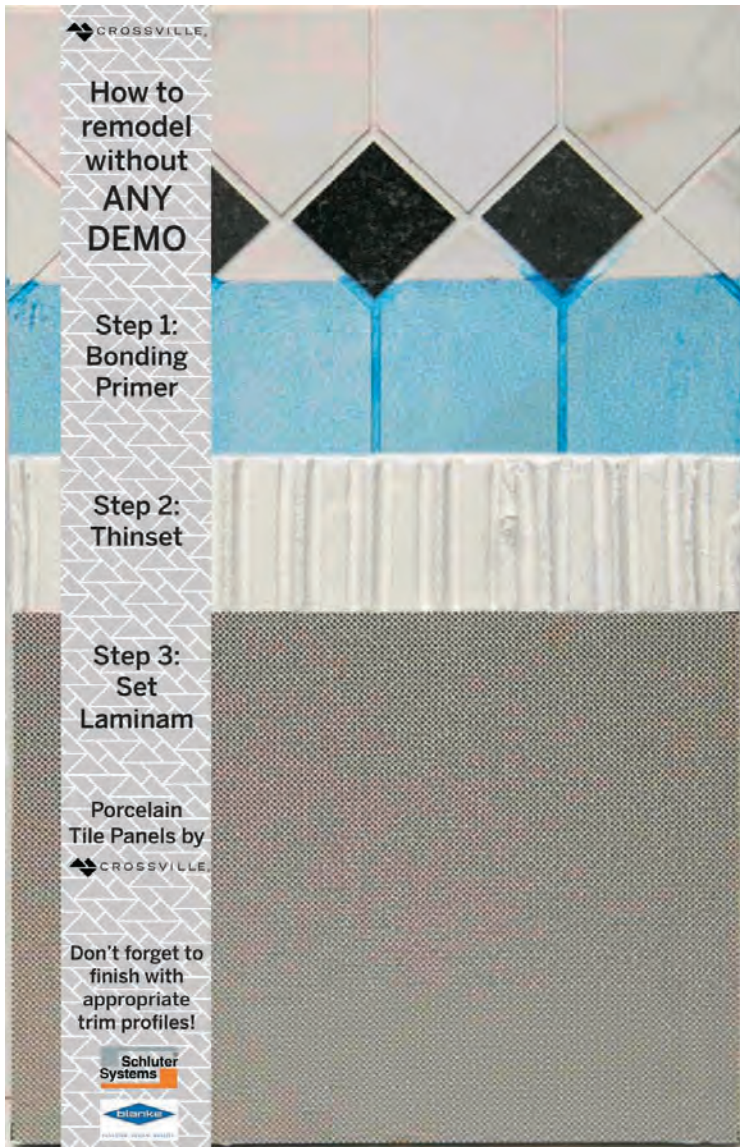

- Create a fresh and flawless space in a faster turnaround when you capture the benefits of the Tile-Over-Tile project
- Time is money
- No or reduced demolition
- Larger thin tile = Big Results

Visit the website to learn more:

[CrossvilleInc.com/Design-Inspiration/Blog/Tile-Over-Tile-Installations-With-Crossville-Porcelain](https://CrossvilleInc.com/Design-Inspiration/Blog/Tile-Over-Tile-Installations-With-Crossville-Porcelain-Tile-Panels)

I Naturali | L3121 Ossidiana Vena Chiara
Holy Cross Hospital, Fort Lauderdale, FL
View Case Study at CrossvilleInc.com

This panel depicts each step in the Tile-Over-Tile Process

TILE-OVER-TILE

Think Thin – Embrace Tile-Over-Tile Installations

Updating a space that has existing but dated tile is highly desirable. Demolition, downtime, and dollars may make a full remodel unattainable. Crossville's Porcelain Tile Panels offer many unique and highly functional features including a new approach to remodeling – Tile-Over-Tile.

Create a fresh and flawless space in a faster turnaround when you capture the benefits of a Tile-Over-Tile project:

TIME IS MONEY

- Faster room turnaround to quickly reestablish the function and usage of the space
- Lower material and labor costs
- Removing the tile added for tear out and replacement of substrates can significantly reduce the overall time for the remodel

NO OR REDUCED DEMOLITION

- Eliminate sound and health contamination
- Reduce waste to landfills
- Minimize dirt and dust during installation
- Lower Volatile organic compounds (VOC)

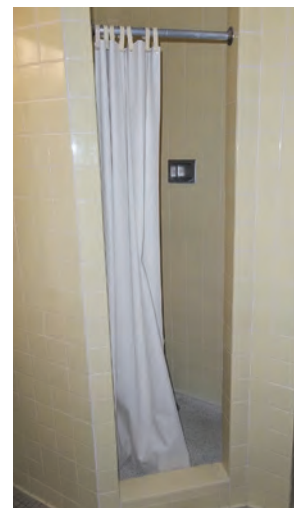

LARGER, THIN TILE = BIG RESULTS

- Smaller and fewer grout joints reduces the opportunity for mold and bacteria
- Contemporary modern clean aesthetic
- Thin tile (3+mm and 5.6mm thickness) easily covers existing tile without adding bulk
- Easy to clean, simplified maintenance
- Lifecycle of porcelain ensures a lifetime of beauty and performance

Take a moment to consider when a Tile-Over-Tile project can add even more value to an installation.

To the right, see Holy Cross Hospital's before and after shots of their Tile-Over-Tile project.

For more information on this project, view our Holy Cross Case Study at CrossvilleInc.com.

Allow minimum 14-16 weeks lead time.

Technical Information

APPLICATIONS

Crossville Porcelain Tile Panels are suitable for many interior and exterior applications:

BUILDING SECTOR

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels and tunnels.

INTERIOR DESIGN

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

SHIPBUILDING SECTOR

The lightness and high technical properties of Crossville Porcelain Tile Panels make it suitable for walls of cruise ships and sports crafts.

COMPOSITE AND STRUCTURAL PANELS

The porcelain tile panels can be placed over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

TECHNICAL SPECIFICATIONS

3+ & 5.6MM

Porcelain obtained by wet grinding of clayish raw materials, granite and metamorphic, feldspar-containing rocks and ceramic pigments. Compacted by a special shaping in compactor and sintering at 1200°C, with controlled firing.

TECHNICAL INFO

3+

3+ is made up of the basic tile panel with the structure reinforced with fiberglass matting applied on the back using special adhesive.

Thickness: 3mm plus .5mm fiberglass mesh.

Use of 3+

- Interior and exterior wall coverings and countertops

5.6MM

5.6mm is the tile panel without reinforcing mesh.

Thickness: 5.6mm

Use of 5.6mm

- Interior floors below, above, and slab on grade concrete and interior and exterior wall coverings and countertops.
(See Crossville Technical Guide for more information)
- **Polished finishes require a penetrating sealer prior to grouting. Please Note: Due to DCOF value, these tile panels are not recommended for applications in wet areas or areas where standing water may occur**

Information listed here is subject to change. Please refer to CrossvilleInc.com for the latest, most accurate information.

Third party certified pre-consumer, recycled content certificates available on the website.

3+: 51.66 lbs / pc

5.6: 93.96 lbs / pc

CHEMICAL RESISTANCE

Porcelain tile panels resist organic and inorganic solvents, disinfectants and detergents. It can be easily cleaned without affecting its surface characteristics; the only product that can attack the tile panels is hydrofluoric acid.

WEAR RESISTANCE

Porcelain tile panels are highly scratch proof and resistant to deep abrasion. The properties of the tiles remain unchanged even after intensive use and frequent cleaning.

HIGH FLEXURAL STRENGTH

Porcelain tile panels have a high modulus of rupture. 3+ and 5.6 are both 50 MOR which are high values. Typical porcelain value is 35-37.

FROST RESISTANCE

Porcelain tile panels average water absorption is 0.1% therefore it is frost resistant and suitable for any weather condition.

FIRE RESISTANT

Porcelain tile panels do not contain organic material therefore it is resistant to fire and high temperatures.

CHROMATIC PROPERTIES

Porcelain tile panels does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colors remain stable.

GRAFFITI

Porcelain tile panels are a graffiti resistant ceramic surface; it is easy to clean and even the strongest paints can be removed.

Inside | Pietra-Di-Cardoso Nero Natural - L9364

SUSTAINABLE

- The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere
- Laminam has led the way to a photovoltaic system being installed on the roofs of its two Fiorano Modenese plants
- Over a year, this photovoltaic system guarantees the production of around 1,050 GWh, thereby enabling the company to produce 10% of its energy requirements
- In terms of CO2 reduction, Laminam's photovoltaic roof system eliminates the release of 525 tons of CO2 into the atmosphere annually
- Member of the Green Building Council Italia, this Italian association of manufacturing leaders strive to transform the building market towards environmental sustainability and to build livable communities. Partners of GBC Italia promote environmental, economic and social responsibility by innovating the way in which buildings are designed, built and used.

ENVIRONMENTAL STATEMENT

Crossville Porcelain Tile Panel collections are excellent choices for those seeking green surfacing solutions for design projects. These tile panels are responsibly made with natural raw materials in the heart of Italy's renowned tile production region. The panels are produced in one of the most advanced, environmentally sound manufacturing facilities in the world. Reflecting global standards in sustainability, the Crossville manufacturing process uses leading edge technology, recycling practices, and incorporates innovative methods to minimize waste and generate energy without depleting the earth's resources.

Created to meet Green Building Council standards, these panels support specifiers' goals for durable, healthy environments. The porcelain tile panels do not release emissions or substances into the environment. Manufacturing requires minimal maintenance, contributing to indoor air quality and providing ease of cleaning long term. The panels' superior performance characteristics lead to long product lifecycles—reducing the need for replacement. However, should panels need to be removed, they can simply be separated from their mesh, milled, and recycled back into the tile production stream.

As porcelain tile panels' popularity grows, the green innovations at the Laminam manufacturing facility advance, do as well. The plant's recently installed photovoltaic roof has already produced 1 GWh of energy and is capable of generating an estimated 1.387 GWh within a year. This will cut CO2 emissions into the atmosphere by 617 tons and empower the Laminam plant to self-generate 15% of its energy requirements.

Distributed exclusively in the U.S. by Crossville, many Laminam porcelain tile panel collections are stocked on American soil. This not only allows for prompt order fulfillment, but it also aids in minimizing fuel and energy consumption related to international shipping and transportation.

Countertop: Black Tie UP - PC008.1SLAB12

Your Advantage...

Super-realistic visuals combine with advanced technical properties to outperform stone, quartz, and even other sintered and porcelain products available today.

Fired with added fiberglass reinforcement on the back, our Porcelain Slabs are high strength and non-porous. The result of world-class manufacturing is unparalleled in the industry.

LONGER LASTING

- Stain resistant
- Resistant to heat and high temperatures
- Resistant to chemicals, acids, alkalis, and solvents
- Resistant to scratching and abrasions
- Fire resistant

EASIER TO MAINTAIN

- Requires no special cleaning products
- Resistant to mold and fungi
- Graffiti resistant

PERFECT FOR OUTDOORS

- Frost resistant
- Colorfast in UV light and severe climate change

EASIER TO FABRICATE

- Dimensional stability makes it easier to cut
- Stressless product to prevent splintering and cracking
- No stress cuts are required

Our unique combination of innovative porcelain products and incomparable customer service offers creative solutions that other countertops can't deliver, for the look you want and the performance your space demands.

DISTINCTIVE VALUES

MAIN FEATURES

Dimensions 1620mm x 3240mm (63.8" x 127.6")
Perfectly Flat
12mm thick, 30kg/m²

CHEMICAL RESISTANCE

Crossville Porcelain Slabs resist organic and inorganic solvents, disinfectants and detergents. They can be easily cleaned without affecting its surface characteristics; the only product that can attack our counters is hydrofluoric acid.

WEAR RESISTANCE

Crossville Porcelain Slabs are highly scratch resistant and resistant to deep abrasion. The properties of the Porcelain Slabs remain unchanged even after intensive use and frequent cleaning.

HIGH FLEXURAL STRENGTH

Crossville Porcelain Slabs have high modulus of rupture.

FROST RESISTANCE

Crossville Porcelain Slabs average water absorption is 0.1% making them frost resistant in any weather condition.

FIRE RESISTANT

Crossville Porcelain Slabs do not contain organic material therefore are resistant to fire and high temperatures.

CHROMATIC PROPERTIES

Crossville Porcelain Slabs do not contain organic pigments and are resistant to UV rays. Even in the harshest sunlight colors stay true.

GRAFFITI

Crossville Porcelain Slabs are graffiti resistant. Even the strongest paints can be removed.

Technical Considerations

As a designer, you need to know all the details to make your project a success. We invite you to view our Porcelain Slab Fabrication Guide for in-depth specification details. For some of the most commonly asked questions, please read on.

What types of edge treatments are available with Crossville Porcelain Slabs?

Crossville Porcelain Slabs may be finished in a variety of ways. Build the product up with mitered edges to your desired thickness. Keep things sleek and modern with a 12mm eased or bullnosed edge. Or bring in the bling with your favorite metallic edging. Here, the creative solution is yours..

Bullnose

Built-up

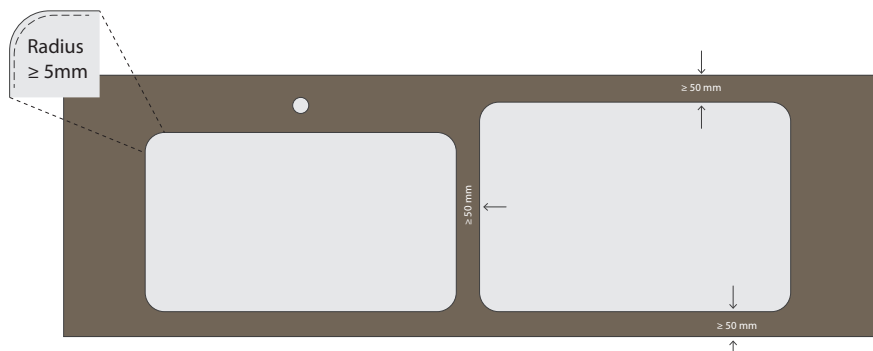

Edge treatment profiles

What is the minimum distance from the edge I can make a cut?

In the design of the countertop, maintain a minimum distance of 50mm from the outer edge before beginning a cut, including those for sinks, faucets, or plugs. 50mm of material must also be maintained between cuts to ensure stability when handling.

The recommended internal corner radius is a minimum of 5mm to distribute stress. While a 90° internal angle may be obtained using a water-jet process, this type of cut increases the possibility of cracking during cutting, transport, and installation.

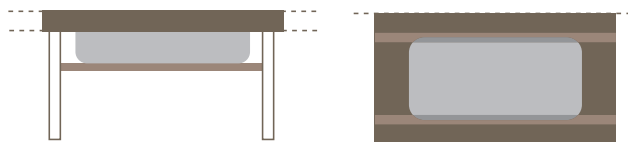

What is the full, usable size of a Crossville Porcelain Slabs?

Each slab can be used to obtain a 1620x3240mm usable surface.

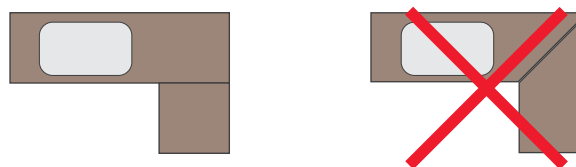

What considerations do I need to give for sinks?

For flush mount installations, please leave a minimum of 2mm between the sink or cook top and the porcelain slab to allow for thermal expansion. When installing an undermount sink, chamfer the edge of the countertop around the hole. Seal the space between the sink/cook top and countertop with silicone, adhesive seal, or an equivalent product. Use one or two support bars fixed to the unit frame to support sinks as this will reduce stress to the countertop.

How do I create an "L" shaped countertop layout?

When creating an "L" shaped counter layout, diagonal joints are not advised. Please seam together in a straight pattern, filling the joint with color-matched silicone or other common seaming materials. Please perform a preliminary check on pieces to make sure both pieces are as compatible as possible.

How far can Crossville Porcelain Slabs overhang?

Overhang dimensions vary by overall countertop proportions. Please refer to our Slab Fabrication Guide for more information.

For more technical guidance on Crossville Porcelain Countertops, please read our Porcelain Slab Fabrication Guide.

Cleaning

Suggested Cleaners For Problem Stains

In keeping with Crossville's long-standing position on sustainability, we highly recommend the use of low VOC, non-hazardous, and non-polluting products for cleaning and maintaining tile and grout (for specific problem stains, please use the following stain removal chart).

These products are used by tile and maintenance professionals and may not be readily available in all areas. Most household cleaners are sufficient to clean common stains as long as they conform to the standards set forth in the Daily Maintenance Section. In the case where stain removal becomes a problem, contact a cleaning and maintenance product supplier or your local tile distributor for professional suggestions.

In keeping with its commitment to quality, Crossville® will offer its Technical Service Department for individualized assistance. This department can assist you in the proper installation and maintenance of all Crossville® Porcelain Stone® tiles. Contact Crossville Technical Services at 931.484.2110.

Crossville® recommends the use of professional cleaning and maintenance products. If additional information or assistance is required on a contaminant not listed, or if you need to find out where the products are sold, please call us, or contact one of the companies to the right.

Test results available on request.

Like any material, Crossville® tile can become slippery when wet. We recommend that care be taken to keep the surface dry.

Color reproduction in the photography in this catalog is representative only. Slight variation is inherent in fired porcelain and natural stone. Before selecting a color, contact your local representative for live samples or order online at crossvilleinc.com

* The increased real world traction of these types of surfaces cannot be fully realized by any current DCOF testing methodology due to their exaggerated facial structures.

Wet Area Use For Mosaic Tiles

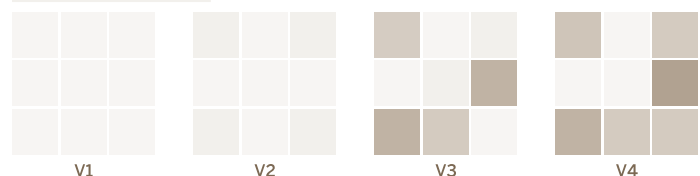

Crossville® produces mosaic tiles with the Cross-Sheen® finish. The AcuTest™ Wet Dynamic COF is ≥ 0.42. Their small sizes ensure frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water, and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Crossville's mosaic to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Shade & Texture Index

V1 = Uniform Appearance	Differences among pieces from the same production run are minimal.
V2 = Slight Variation	Clearly distinguishable differences in texture and/or pattern within similar colors.
V3 = Moderate Variation	While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or textures to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.
V4 = Substantial Variation	Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or textures from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

Inspect products upon delivery and for best results, blend tile from several cartons during installation.

Crossville Appendix

DEFINITIONS

Bullnose* – Rounded convex trim used to provide a smooth, rounded edge for countertops, stair steps, and building corners. This is the most used trim shape for wall tile installations. Wall tile bullnose is sometimes referred to as surface cap. It has one rounded finished edge on the tile and can be used horizontally or vertically. Left Bullnose Corner & Right Bullnose Corner are also referred to as Double Bullnose.

Calibrated Tile – Tiles that have been sorted to meet a pre-determined acceptance of variable range in size. Crossville® recommends a minimum grout joint of 3/16 inch.

Cross-Sheen® (UPS) – An invisible, integrated treatment that protects surfaces from the defacing effects of scuffs, stains, and even permanent marker and graffiti while imparting a subtle, color-enhancing glow.

Cross-Slate® (CS) – The Cross-Slate® finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone® for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

Cross-Tread® (CTS) – Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread® surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Cove Base (Standard, round top)* – This cove base has a rounded finished top like bullnose and is used as a cove base in areas that will not have wall tile installed above it.

Cove Base (Universal, flat top)* – This cove base has a finished, flat top. It can be used alone or with tile stacked on top. Exception: Color By Numbers® cove base has an unglazed, flat top.

Dynamic Coefficient of Friction (DCOF) – Sometimes called kinetic coefficient of friction. This is the ratio of the force necessary to keep a surface already in motion sliding over another divided by the weight (or normal force) of an object. This force is a materials property of the two surfaces. DCOF is usually less than SCOF for the same materials. Contaminants such as dirt, water, soap, oil, or grease can change this value.

Exterior (EXT) – A textured finish designed for exterior walking surfaces in residential and commercial environments where enhanced traction is desired. Exterior products are also suitable for interior paving, especially in wet areas.

Honed (HON)/Semi-Polished (SPO) – A uniform, semi-polished finish that results from mechanically altering the surface.

Modular – Tiles of various dimensions are sized so that they may be installed together in patterns with a common specified joint width. The difference between Actual and Nominal is the grout joint.

Patterned (PTN) – A repeated, decorative texture or finish created for visual interplay and/or interest.

Polished (PO) – Polished Porcelain Stone® is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Rectified/Cross-Gr d® – A tile that has had all edges mechanically finished to achieve a more precise facial dimension. 3-4mm grout joint recommended.

Satin (SAT) – A smooth, semi-matte finish that results from mechanically altering the surface.

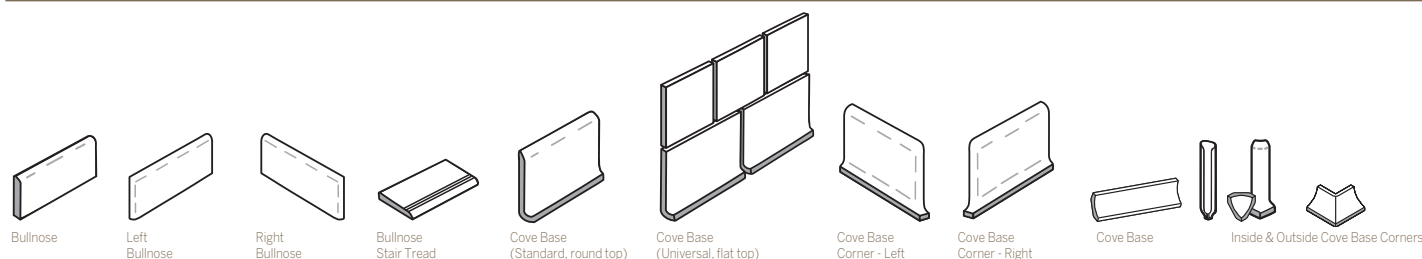

Textured (TX) – The rustic appearance and texture of natural slate designed for improved traction on exterior walking surfaces.

Through-body Color – The color of the tile is the same through and through.

Unpolished (UPS) – Cross-Sheen® finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen® finish is appropriate for high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen® finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Unpolished (UP) – A subtle, unaltered finish that may incorporate subtle variations in texture or gloss.
