Welcome to Crossville, Inc.

We love partnering with designers like you for one simple reason: what inspires you, inspires us.

CREATIVE SOLUTIONS FOR EVERY PROJECT
For more than 30 years, designers and architects, retailers, and specifiers have looked to Crossville for creative solutions. This catalog will familiarize you with our products, services, and complimentary samples. Finding your next inspiration isn’t always obvious, but finding the right partner should be.

HIGHEST STANDARDS FROM THE INSIDE OUT
Crossville is a subsidiary of The Curran Group, a family-owned, privately held corporation. We run on the same principles that the Currans are known for in all their business endeavors: family, partnership, integrity, improvement, and respect. Get to know us, and you’ll find that our unique value system guides our relationships with employees, business associates, and with you, our customers.

FAMILY OWNED AND DESIGNED IN THE U.S.
As America’s first manufacturer of large format porcelain tile, Crossville brings a history of innovation to clients who expect the highest standards inside and out. In fact, a majority of our tile is made here in the United States. As a subsidiary of The Curran Group we remain true to core values of family, partnership, integrity, improvement, and respect.
PORCELAIN STONE®

If you expect your design materials to rise to the level of your creative vision, Porcelain Stone by Crossville is the clear choice. With hundreds of styles, colors, and sizes, Porcelain Stone provides design flexibility demanded by the nation’s top architects and designers. Strong, durable, and stain resistant, it’s backed by a no-nonsense warranty.
NATURAL STONE
From the casual warmth of multi-stoned slate and the polished elegance of black and white marble, natural stone collections by Crossville provide a tapestry of colors, shapes, and textures to create a beautiful backdrop for living.

GLASS TILE
With Crossville’s glass tile, bring your vision to life with creative, colorful designs on walls and ceilings. Play with vibrancy, boldness, or soft pastels and neutrals to create a statement that can’t be ignored.

WALL TILE
Bring beauty to a new canvas with Crossville’s wall tile. Handmade wall tile gives design a specialized touch in a consistent execution. Lasting looks are brought to life in endless creative solutions.
Uniquely Crossville

DESIGN TOOLS
Planning and visualization tools for designers and architects are available on CrossvilleInc.com/Resources/Tile-101.

FLOOR PATTERNS
Explore nearly 100 floor tile patterns with suggested tile sizes and collections for each.

SELECTING A GROUT
Find the best grout types and colors to complete your tile design.

GET PLANKED
Request your favorite tile in popular plank sizing (most Crossville collections are eligible).

MOSAIC BUILDER
Choose from nearly endless combinations of Crossville glass tile colors and sizes to design custom mosaic for walls, floors, and more.

CROSS-VISION®
Create, save, and print visualizations of paint and flooring combinations, either within stock Crossville environments or via your own uploaded images. Visit our visualizer tools at CrossvilleInc.com/Design-Inspiration/Design-Visualizers.

NATIONAL ACCOUNTS
Clients working on national, multi-location projects face unique challenges and need a partner with the ability to meet their requirements across large geographical areas, ensuring every site consistently receives high quality material on time. That’s where the Crossville National Account Team steps in. With extensive experience in the retail, automotive, quick-serve restaurant, convenience, and hospitality segments, our in-house National Accounts Team has what it takes to manage supply chain needs. They provide expert materials forecasting, sales support, order processing, and inventory management.

Contact a National Accounts representative at (931) 484-2110 to learn more about the following:
• Dedicated customer focus with more than 26 years of service to commercial development.
• State-of-the-art logistics to ensure major market delivery 2-3 times per week.
• Special pricing programs to assist with cost-control needs.
• Expert materials forecasting, sales support, order processing and inventory management.
• Extended product warranties and custom designs for more creative freedom.

GSA ADVANTAGE
Quality Crossville products are available at GSA pricing
Designing for government projects? Our extensive line of award-winning Porcelain Stone floor and wall tile, and our line of accent tiles, is available to government customers at GSA pricing.

Fast delivery
Centrally located in Crossville, Tennessee, we have an industry-leading logistics system to ensure you get your tile when and where you need it, on time and on budget.

On contract
Our GSA contract number is GS-07F-0429 and the TXMAS contract number is TXMAS-5-0560. Our products may also be purchased on state contracts.
Special Services

ORDERING SAMPLES
Order complimentary samples in the color of your preference at CrossvilleInc.com.

OTHER SPECIAL SERVICES INCLUDE:
• Loose samples are free for architects and designers. See back cover for details.
• Chip kits are available through your local distributor.
• Custom patterns using 3x3 mosaics may be ordered through your local distributor; please allow adequate lead time.
• Water jet cutting service offers infinite design possibilities from company logos to the most intricate of murals. Contact your local distributor for more details.
• Crosstyle® provides custom cutting of any of Crossville Porcelain Stone tile into any geometric, straight-edged piece 2x2 or larger.
• Crossville now offers each of its Porcelain Stone products in popular plank shapes, with no minimum order and quick order fulfillment (most Crossville collections are eligible).
• Given the extreme hardness and durability of Crossville Porcelain Stone, cutting the tile or drilling holes requires specific blades and drill bits. Go to CrossvilleInc.com, and visit the Resources/Installation Guide section for our cutting and core drilling guides.
• Crossville offers an online booklet of pattern layout designs called the “Pattern Book.” Contact your local distributor or visit Crossville’s website at CrossvilleInc.com.
• Crossville offers custom color service. Minimum order requirement and special set-up fees apply.
• Crossville offers Cross-Grid®, a process that grinds all four sides of our Porcelain Stone tiles. This squaring is also called rectified, and it allows the tile to be installed with narrower grout joints.
• Crossville’s website offers a variety of additional tools and information valuable to both professionals and homeowners.

</table>

* Wet areas consist of surfaces that are either soaked, saturated, or subjected to moisture (such as gang showers, tub enclosures, laundry rooms).

** Excludes mesh mounted mosaics. Contact your Crossville sales representative for more information.

NOTE: Trim applications will differ from field tile applications for the same series.

† 2 x 2 or 3 x 3 UPS mosaic only, see Tile Performance Data Chart for additional information on wet area use for mosaic tiles.

†† Recommended for light-duty horizontal use in residential applications only.

††† 4 x 4 hex for light-duty horizontal use in residential applications only.
NEED IT IN PLANKS?
Found the perfect tile, but need it in planks?

Crossville now offers each of its Porcelain Stone products in popular plank shapes. With no minimum order and quick order fulfillment, you’ll be seeing planks in no time.

Depending on the product selected there are 4 possible widths and 7 possible lengths, which add up to more than 2,596 shape combinations.

Many of Crossville’s tiles are now available in the much-requested Half-Plank size (square tile cut in half). For the latest information about half-planked tile, please visit CrossvilleInc.com or phone: 931.484.2110

* Not all sizes shown are available in every product series. Allow 2-4 weeks based on availability for Get Planked orders.
Wet DCOF/Safety Considerations

DCOF ACUTEST℠

The Wet DCOF AcuTest℠ is the new standard for accurately determining the actual coefficient of friction on a tile surface. Developed by the Tile Council of North America (TCNA), the Wet DCOF (Dynamic Coefficient of Friction) AcuTest is a repeatable, reproducible method of measuring DCOF. This method uses a specifically engineered device to perform the required testing, ensuring the most precise results. The Wet DCOF AcuTest is included in the latest version of ANSI A137.1 Specifications for Ceramic Tile.

SAFETY CONSIDERATIONS FOR TILE

• In areas where standing water may occur, selected tile should have an elevated DCOF rating. Please refer to the “Tile Performance Data” page for additional information.
• Polished tile should not be used in areas where standing water, oil, or grease may be present due to the tile’s low coefficient of friction.
• Pool deck tiles, whether interior or exterior, should have a surface texture that provides an elevated DCOF rating. Please refer to the “Tile Performance Data” page for additional information.
• Ramps or inclines should have an increased DCOF.
• There are no tiles that are slip proof, only slip resistant.

The defining threshold value is 0.42 for level interior spaces expected to be walked upon when wet, a wet DCOF of less than 0.42 shall only be installed when the surface will be kept dry when walked upon and proper safety procedures will be applied when cleaning the tiles.

The Tile Council of North America (TCNA), established in 1945, has a leadership role in promoting the use of ceramic tile and in developing North American and international industry standards. To learn more about TCNA, please go to tcnatile.com.
Finishing, Coating, and Cladding

**CROSS–SHEEN®**
- Protect tile from stains, scuffs, and graffiti.
- Integrated invisible finish that requires only a mild cleaner for hassle-free maintenance.
- Applicable to exterior and interior walls as well as interior flooring for commercial or residential.
- Exclusively from Crossville, and made in the U.S. to stringent specifications.
- Visit us online for usage of Cross-Sheen in the redesign of DeAnza High School, Ashland Youth Center, and others.

**HYDROTECT™ COATING**
- Revolutionary invisible coating self-cleans exteriors against dirt, grime, algae and pollution.
- Applicable to floors and walls indoors and outside.
- No toxic chemicals needed to maintain that Day 1 look for years to come.
- Purifies exterior air by reducing greenhouse gases, environmental pollutants and volatile organic compounds in the presence of UV light.
- A 10,000-square-foot area of tiles can clean the air as effectively as 70 poplar trees or green space the size of four tennis courts.

To learn more about Cross-Sheen and Hydrotect visit [CrossvilleInc.com/Tile-101/Finishes-Coatings](http://CrossvilleInc.com/Tile-101/Finishes-Coatings).

**EXTERIOR CLADDING**
- Offers both aesthetic appeal and structural functionality.
- Graffiti resistant and appropriate for all kinds of environments.
- Engineered for utility savings due to thermal mass advantages.
- Contact us at [crossc@crossvilleinc.com](mailto:crossc@crossvilleinc.com) to learn more.
Sustainability

RECYCLED CONTENT
At Crossville, we put our name behind every product we sell. That’s why we have developed the EcoCycle Tile Process™ logo, which will be shown in conjunction with products containing recycled content. Tile containing a specified minimum amount of recycled content will be designated with a percentage shown in the logo. In addition, this logo will specify the nature of the recycled content, such as pre-consumer or post-consumer.

RECYCLED PRODUCTS
Crossville recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. In addition to its own fired waste recycling, Crossville also accepts and recycles reclaimed, previously installed tile through its Tile Take-Back® Program. For more information, visit CrossvilleInc.com/green.

TILE TAKE-BACK® PROGRAM
With our Tile Take-Back® Program, Crossville, the tile industry’s leader in sustainable initiatives, solves the major environmental problem facing the tile industry today: recycling fired tile.

Previously, pre and post-consumer tile has been considered non-recyclable. While many tile manufacturers, including Crossville, have successfully reused scrap powders and unfired tile, hundreds of millions of pounds of damaged or otherwise unsellable fired tile (tile in its finished state), have gone to landfills each year. Additionally, there has been no environmentally friendly manner to dispose of previously installed tile.

We have developed a proprietary system of processing porcelain tile back into powder used in manufacturing new tile. The resulting new products will have a verifiable recycled content, and more than 4 million pounds of tile that Crossville previously sent to local landfills will be recycled. This is in addition to any tile Crossville will receive through our groundbreaking Tile Take-Back Program. Not only will the new process allow Crossville to repurpose its own scrap tile, but will allow the company to take back samples and previously installed tile, always a concern for environmentally-minded designers and building owners.

LEED INFORMATION
For information on Crossville’s recycled products and their relation to LEED information, please visit CrossvilleInc.com.
Sustainability

SUSTAINABLE PARTNERSHIPS
In our efforts to preserve the environment, Crossville partners with TOTO USA, the world’s largest plumbing products manufacturer, to recycle pre-consumer waste. Crossville has developed a proprietary system of processing TOTO’s sanitary ware waste back into powder used in manufacturing new tile.

In March 2011, Crossville became a net consumer of waste, meaning we recycle more waste into new products than we generate through our manufacturing processes.

This recycling conserves resources; the volume of finished goods Crossville ships now exceeds the amount of raw material it extracts from the earth for use in manufacturing.

SUSTAINABLE OPERATIONAL PROCEDURES
In order to minimize our impact on the environment, Crossville goes beyond offering recycled products. Crossville’s sustainable operational procedures include:

• Printing of marketing materials at Forestry Stewardship Council certified facilities; use of soy inks and recycled paper whenever possible.
• Packaging of samples, merchandising materials and piece goods with recycled/recyclable wrapping and cushioning.
• Company-wide recycling program for all office and production facility paper waste.

GREEN SQUARED™ CERTIFICATION
The standard in sustainability for the tile industry in North America is ANSI A138.1. Crossville was the first manufacturer to achieve Green Squared™ certification for its entire U.S. manufactured porcelain tile product line-up, which is manufactured in Crossville, TN, as well as its production processes. Green Squared is the stringent and powerful new measure for tile industry sustainability developed by Tile Council of North America under the American National Standards Institute (ANSI) process.

Green squared™

• Evaluates products and processes in five key environmental and social categories:
  • Product characteristics
  • Manufacturing operations
  • Corporate governance
  • Innovation
  • End-of-life product management
• Recognizes manufacturers for leadership in environmental stewardship and corporate responsibility.
• Serves as the standard bearer to ensure transparent, full disclosure of sustainability product, manufacturer by manufacturer industry wide.

ECOCYCLE TILE PROCESS™
Through the EcoCycle Tile Process™, Crossville recycles millions of pounds of tile waste each year that would otherwise be sent to landfills. The two-pronged, proprietary process addresses the recycling of fired tile and filtrate waste. It’s a major contributor to Crossville’s status as a net consumer of waste (the company recycles more waste than it produces)—a distinction that no other domestic tile manufacturer has yet to achieve.

Recommended Use

Cross-Colors (UPS) is recommended for interior floors, walls, countertops, and exterior walls in both commercial and residential applications. Cross-Colors (PO) is recommended for interior floors (except where standing water may occur), walls, countertops and exterior walls in both residential and commercial environments.

See CrossvilleInc.com for detailed installation instructions.
Cross-Colors

Cross-Colors

A790 Burgundy Smoke

Crossville offers designers, architects, and builders the utilitarian textures to answer the specific needs of those areas with the highest exposure. These textures are an integral part of the tile and cannot be worn down. No matter how technical the specifications, we have a surface that is highly functional, yet able to blend beautifully with any design application. Please refer to the Tile Performance Data chart in the back of this catalog for actual tile performance details.

Unpolished (UPS)
Cross-Sheen finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen finish is appropriate high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Polished (PO)
Polished Porcelain Stone is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Cross-Slate® (CS)
The Cross-Slate finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

Cross-Tread® (CTS)
Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Unpolished (UPS)
Polished (PO)
Cross-Slate® (CS)
Cross-Tread® (CTS)

Example Sizes (Field tile available in all colors)

Wet Area Use for Mosaic

See Tile Performance Data chart.

Recommended Use

Main Street is recommended for interior floors, walls, countertops, and exterior walls in both residential and commercial applications. Main Street is not recommended for exterior horizontal surfaces or exterior paving. If offset pattern is required for tiles 15 inches or longer, Crossville recommends an offset of not greater than 33%.

See CrossvilleInc.com for detailed installation instructions.
Moonstruck

- Available in the 18 x 36 format
- Available in UPS or Honed Finish
- Cross-Sheen finish for easy cleaning (UPS only)
- Field Tile - Rectified
- Recommended grout joint: 3mm
- Get Planked available

Visit the website to learn more: Crossvilleinc.com/Products/Moonstruck

<td>297 x 297</td>
<td>10.5</td>
<td>UPS</td>
</tr>
</tbody>
</table>

* 2 x 2 Square Mosaic mounted on 12 x 12 sheet.
* Block Mosaic mounted on 12 x 12 sheet.

### COORDINATING TRIM

<table>
<thead>
<tr>
<th>Nominal (in)</th>
<th>Actual (mm)</th>
<th>Thickness (mm)</th>
<th>Finish</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 x 18 Single Bullnose</td>
<td>147 x 447</td>
<td>10.5</td>
<td>UPS</td>
</tr>
<tr>
<td>6 x 12 Cove Base</td>
<td>150 x 297</td>
<td>10</td>
<td>UPS</td>
</tr>
</tbody>
</table>

### Recommended Use

Reformation is recommended for interior floors, walls, countertops and exterior walls in both residential and commercial applications. If offset pattern is required for tiles 15 inches or longer, Crossville recommends an offset of not greater than 33%. See CrossvilleInc.com for detailed installation instructions.

Yin + Yang natural stone is recommended for interior and exterior walls. It is recommended for dry interior floors. Yin + Yang is not suitable for the lining of pools, fountains, or spas.

This natural stone displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure optimum installation.

Recommended Use

For complete care and maintenance information of stone products, the Marble Institute of America provides extensive information on their website, marbleinstitute.com/consumers/care.cfm. Phone (440) 250-9222.

* Please note that the various tile planks and mosaic in the Yin + Yang series are modular with each other however; the facial dimensions and thickness of cut stone tiles can vary. These irregularities are what gives stone tiles and mosaic their handmade appearance. As such, very narrow grout joints and precise alignment of the field tiles may be difficult to achieve.

** Sold as loose pieces  
Shown in multiple pieces to show variation.
Koi Pond displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure optimum installation.

Recommended Use

Convergence is recommended for interior walls in wet or dry locations.
Ebb & Flow

• Harmonic blending of glass and natural stone
• Variety of shapes and sizes
• Inspired by nature
• Select Yin + Yang products to coordinate with select Ebb & Flow

Visit the website to learn more:
CrossvilleInc.com/Products/Ebb-and-Flow
Crossville’s Ebb & Flow mosaic can be used for interior walls and covered exterior wall applications. In wall applications exposed to regular moisture (such as shower walls) the application of a penetrating sealer, such as Miracle 511 Impregnator, is required. See detailed installation instructions at CrossvilleInc.com.

### Mesh-mounted Mosaic

Mesh mounted on a 300 x 300mm sheet. Available in all colors.

### Recommended Use

Sideview Glass tile can be used for interior walls in wet or dry applications.

### Cleaning

Regular cleaning is the best way to keep Sideview Glass tile looking good for years to come. Use clean, hot water combined with a household cleaner for more aggressive cleaning. Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville products is available at CrossvilleInc.com.

</table>

** Handcrafted Variation

Handwritten tiles are manufactured to appear handmade. Due to this handmade appearance, variations in size, thickness, flatness and color are to be expected. Therefore, blending the tile before and during installation is recommended.

Example Sizes (Field tile available in all colors)

<table>
<thead>
<tr>
<th>Nominal (in)**</th>

<tr>
<td>3 x 12</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Recommended Use

Crossville recommends Handwritten tile for interior vertical surfaces in all residential and light commercial applications. Applications may include light-duty bathroom walls, vanity tops, kitchen backsplashes, and light-duty kitchen countertops.
Simpatico

• Features contemporary textures in gloss or satin finishes
• Four accent colors bring a retro feel to modern design
• 6 x 24 and 12 x 24 inch formats offer added versatility
• Coordinates with Color by Numbers

## Cleaning

### Suggested Cleaners For Problem Stains

In keeping with Crossville’s long-standing position on sustainability, we highly recommend the use of low VOC, non-hazardous, and non-polluting products for cleaning and maintaining tile and grout (for specific problem stains, please use the following stain removal chart).

These products are used by tile and maintenance professionals and may not be readily available in all areas. Most household cleaners are sufficient to clean common stains as long as they conform to the standards set forth in the Daily Maintenance Section. In the case where stain removal becomes a problem, contact a cleaning and maintenance product supplier or your local tile distributor for professional suggestions.

In keeping with its commitment to quality, Crossville will offer its Technical Service Department for individualized assistance. This department can assist you in the proper installation and maintenance of all Crossville Porcelain Stone tiles. Contact Crossville Technical Services at 931.484.2110.

Crossville recommends the use of professional cleaning and maintenance products. If additional information or assistance is required on a contaminant not listed, or if you need to find out where the products are sold, please call us, or contact one of the companies to the right.

*For problem stains, it may be necessary to use an abrasive powder compound in conjunction with the above cleaners. With Heavy-Duty Tile & Grout Cleaner or Grout Haze Clean-Up, use Aqua Mix Poultice. Please be careful to follow manufacturers recommended procedures when using any cleaning product. To download a copy of “How to Care for Porcelain Stone” tile, be sure to visit our web site at Crossvilleinc.com.
## Wet Area Use For Mosaic Tiles

Crossville produces mosaic tiles with the Cross-Sheen finish. The AcuTest® Wet Dynamic COF is ≈ 0.42. Their small sizes ensure frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water, and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Crossville’s mosaic to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

### Cross-Colors Mingles

- Polished (PO)         | < 0.10%          | < 150    | 350-420 lbf > 200 psi | 31 – 41       | ± 0.15%                | 0.015 ± 0.20% ± 0.30% | Resistant          | Unaffected        | 7       |
- Unpolished (UPS)      | < 0.20%          | ≥ 400 lbf | > 200 psi | 50 – 60 | ± 0.15% | 0.015 ± 0.20% ± 0.30% | Resistant          | Unaffected        | 7       |
- Cross-Slate® (CS)     | < 0.10%          | < 150    | 350-420 lbf > 200 psi | 50 – 60 | ± 0.15% | N/A ± 0.20% ± 0.30% | Resistant          | Unaffected        | 7       |
- Cross-Tread® (CTS®)   | < 0.10%          | < 150    | 350-420 lbf > 200 psi | 50 – 60 | ± 0.15% | N/A ± 0.20% ± 0.30% | Resistant          | Unaffected        | 7       |

---

### Color reproduction in the photography in this catalog is representative only. Slight variation of Friction ± 0.15% for the same production run is minimal. Differences among pieces from the same production run are minimal.

1. The increased real world traction of these types of surfaces cannot be fully realized by any current DCOF testing methodology due to their exaggerated facial structures.

---

**Inspect products upon delivery and for best results, blend tile from several cartons during installation.**
DEFINITIONS

**Bullnose** – Rounded convex trim used to provide a smooth, rounded edge for countertops, stair steps and building corners. This is the most used trim shape for wall tile installations. Wall tile bullnose is sometimes referred to as surface cap. It has one rounded finished edge on the tile and can be used horizontally or vertically. Left Bullnose Corner & Right Bullnose Corner also referred to as Double Bullnose.

**Calibrated Tile** – Tiles that have been sorted to meet a pre-determined acceptance of variable range in size. Crossville recommends a minimum grout joint of 3/16 inch.

**Cross-Sheen® (UPS)** – An invisible, integrated finish that protects the look of nearly any Crossville tile from the defacing effects of scuffs, stains, even permanent marker, and graffiti.

**Cross-Slate® (CS)** – The Cross-Slate finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

**Cross-Tread® (CTS)** – Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

**Cove Base (Standard, round top)** – This cove base has a rounded finished top like bullnose and is used as a cove base in areas that will not have wall tile installed above it.

**Cove Base (Universal, flat top)** – This cove base has a finished, flat top. It can be used alone or with tile stacked on top. Exception: Color By Numbers and Swatches cove base have an unglazed, flat top.

**Dynamic Coefficient of Friction (DCOF)** – Sometimes called kinetic coefficient of friction. This is the ratio of the force necessary to keep a surface already in motion sliding over another divided by the weight (or normal force) of an object. This force is a materials property of the two surfaces. DCOF is usually less than SCOF for the same materials. Contaminants such as dirt, water, soap, oil, or grease can change this value.

**Honed (HON)/Semi-Polished (SPO)** – Tile that has had the surface mechanically altered to a uniform, semi-polished finish.

**Modular** – Tiles of various dimensions are sized so that they may be installed together in patterns with a common specified joint width. The difference between Actual and Nominal is the grout joint.

**Patterned (PTN)** – A repeated, decorative texture or finish created for visual interplay and/or interest.

**Polished (PO)** – Polished Porcelain Stone is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

**Rectified/Cross-Grid** – A tile that has had all edges mechanically finished to achieve a more precise facial dimension. 3-4mm grout joint recommended.

**Satin** – Tile that has had the surface mechanically altered to produce a smooth, semi-matte finish.

**Textured (TX)** – The appearance and rustic look of natural slate.

**Through-body Color** – The color of the tile is the same through and through.

**Unpolished (UPS)** – Cross-Sheen finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen finish is appropriate high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

**Unpolished (UP)** – Material with a fused impervious facial finish, composed of ceramic materials, normally absent of gloss or shine. May be textured or smooth to the touch.
