Leadership.

Crossville is the leading supplier of gauged porcelain tile panels in the United States. We were one of the first to bring this material to the US, and not only stock over 60 skus in our Tennessee-based warehouse, we have trained thousands of installers on how to successfully handle the material. Our goal is to make your designs the best they can be, and with best in class materials, handling, and installation, we do just that. With Crossville, creative solutions never compromise.

Ready to answer your unique needs.

With over 30 years of experience in our industry, we're adept at answering the unique needs of customer groups. Our range of special programs and products are thoughtfully developed to make life simpler for architects, contract designers, residential designers, retailers, and specifiers for national accounts. Whatever you need, we—alongside our distributors' sales teams—are ready to assist.

Highest standards from the inside out.

Crossville® is a subsidiary of The Curran Group, a family-owned, privately held corporation. We run on the same principles that the Currans are known for in all their business endeavors: family, partnership, integrity, improvement, and respect. Get to know us, and you'll find that our unique value system guides our relationships with employees, business associates and with you, our customers.

Independence Blue Cross

Philadelphia, PA

The renovation of Philadelphia's Independence Blue Cross (IBC) corporate headquarters, housed in the city's iconic Independence Tower, was significant in both its size and scope; the redesign of the 45 floors—accounting for a total of 840,000 square feet—was to not only create a dynamic workspace for employees but also launch the company's new brand identity.

COUNTER

WALL

Calce

Gauged Porcelain Tile Panels

Neutral colors and delicate nuances mark the face of Calce, a line inspired by wet plaster and concrete. The combination results in a soft, chalky visual that is both sophisticated and thoroughly contemporary. In sizes as large as 1m x 3m, this soft whisper makes a bold statement.

Walls and Ceiling: Laminam by Crossville® 3+ - Bianco F6385

I Metalli

Gauged Porcelain Tile Panels

I Metalli brings the look of aged metal, but with the ease of maintenance only porcelain can bring. With texture evoking diamond plate, the distressed, oxidized look is both industrial and luxurious thanks to tones of iron, brass, copper, and bronze. Changes in gloss refract light for a multidimensional surface sure to bring interest to any space.

Maximum freedom of expression and unexplored possibilities in interior design create a unique collection, which enhances the formal elegance of stone in large dimensions, with reduced thickness, easy handling and speedy application.

I Naturali

Gauged Porcelain Tile Panels

Amarillo High School Amarillo, TX

Public schools often go decades without renovations. When the opportunity for a redesign presents itself, it is especially important that the materials specified both hold up well to the wear and tear of the environment and look good for years to come.

Tile-Over-Tile

Gauged Porcelain Tile Panels

Holy Cross Hospital

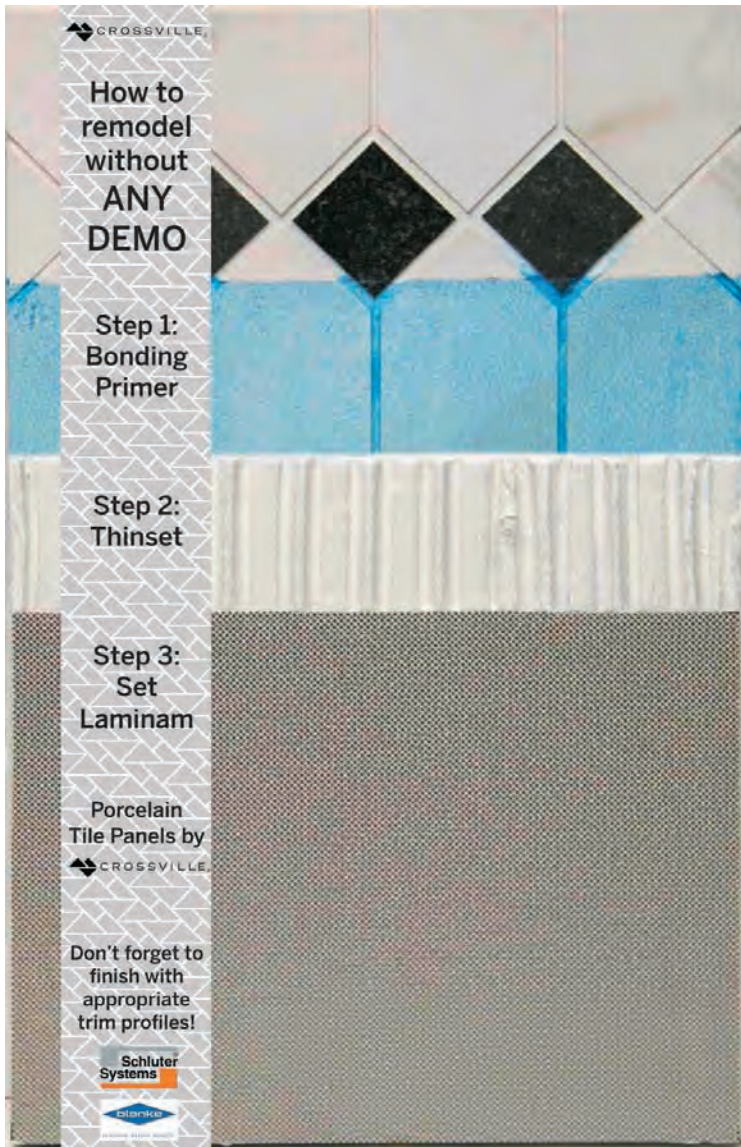

Fort Lauderdale, FL

These maternity unit bath remodels were birthed in record time, thanks to easy-to-install Laminam by Crossville, and use of Tile-Over-Tile installation.

Tile-Over-Tile

Gauged Porcelain Tile Panels

This panel depicts each step in the Tile-Over-Tile Process

TILE-OVER-TILE

Think Thin – Embrace Tile-Over-Tile Installations

Updating a space that has existing but dated tile is highly desirable. Demolition, downtime, and dollars may make a full remodel unattainable. Crossville's Laminam Porcelain Tile Panels offer many unique and highly functional features including a new approach to remodeling – Tile-Over-Tile.

Create a fresh and flawless space in a faster turnaround when you capture the benefits of a Tile-Over-Tile project:

TIME IS MONEY

- Faster room turnaround to quickly reestablish the function and usage of the space
- Lower material and labor costs
- Removing the tile added for tear out and replacement of substrates can significantly reduce the overall time for the remodel

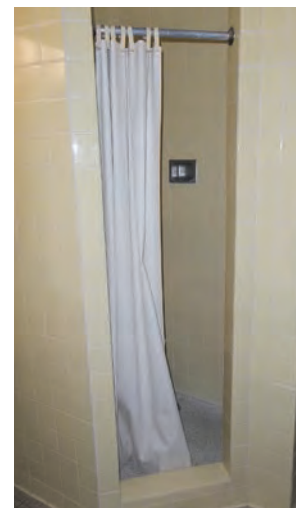

NO OR REDUCED DEMOLITION

- Eliminate sound and health contamination
- Reduce waste to landfills
- Minimize dirt and dust during installation
- Lower Volatile organic compounds (VOC)

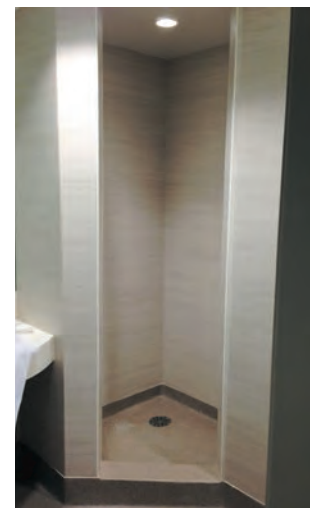

LARGER, THIN TILE = BIG RESULTS

- Smaller and fewer grout joints reduces the opportunity for mold and bacteria
- Contemporary modern clean aesthetic
- Thin tile (3+mm and 5.6mm thickness) easily covers existing tile without adding bulk
- Easy to clean, simplified maintenance
- Lifecycle of porcelain ensures a lifetime of beauty and performance

Take a moment to consider when a Tile-Over-Tile project can add even more value to an installation.

Before

After

To the right, see Holy Cross Hospital's before and after shots of their Tile-Over-Tile project.

COLOR AND SIZE REFERENCE CHART

Note: Please Contact Customer Service for lead times and availability. 1M1M and additional cut sizes are also available as special order only. Allow 3-4 weeks lead time for custom cut.

† Polished Finishes require a penetrating sealer prior to grouting. **Please Note:** Due to DCOF value, these tile panels are not recommended for applications in wet areas or areas where standing water may occur.

X Special Order Items are full crate only. Allow minimum 14-16 weeks lead time.

Technical Information

Gauged Porcelain Tile Panels

APPLICATIONS

Laminam® is suitable for many interior and exterior applications:

BUILDING SECTOR

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels and tunnels.

INTERIOR DESIGN

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

SHIPBUILDING SECTOR

The lightness and high technical properties of Laminam make it suitable for walls of cruise ships and sports crafts.

COMPOSITE AND STRUCTURAL PANELS

The porcelain tile panels can be placed over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

TECHNICAL SPECIFICATIONS

LAMINAM 3+ & 5.6MM

Porcelain obtained by wet grinding of clayish raw materials, granite and metamorphic, feldspar-containing rocks and ceramic pigments. Compacted by a special shaping in compactor and sintering at 1200°C, with controlled firing.

TECHNICAL INFO

LAMINAM 3+

Laminam 3+ is made up of the basic tile panel with the structure reinforced with fiberglass matting applied on the back using special adhesive.

Thickness: 3mm plus .5mm fiberglass mesh.

Use of Laminam 3+

- Interior and exterior wall coverings and countertops

LAMINAM 5.6MM

Laminam 5.6mm is the tile panel without reinforcing mesh.

Thickness: 5.6mm

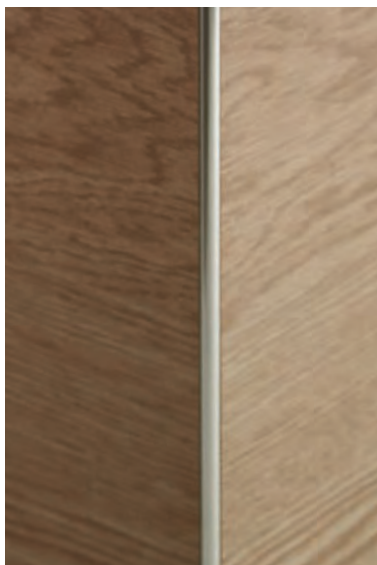

Use of Laminam 5.6mm

- Interior floors below, above, and slab on grade concrete and interior and exterior wall coverings and countertops. (See Laminam Technical Guide for more information)
- **Polished finishes require a penetrating sealer prior to grouting. Please Note: Due to DCOF value, these tile panels are not recommended for applications in wet areas or areas where standing water may occur**

Information listed here is subject to change. Please refer to CrossvilleInc.com for the latest, most accurate information.

Third party certified, pre-consumer, recycled content certificates available on the website.

EDGE FINISHING TECHNIQUES

Laminam 3+ and 5.6mm

DISTINCTIVE VALUES

MAIN FEATURES

Dimensions 1000mm x 3000mm

Perfectly Flat

3+: 51.66 lbs / pc

5.6: 93.96 lbs / pc

CHEMICAL RESISTANCE

Porcelain tile panels resist organic and inorganic solvents, disinfectants and detergents. It can be easily cleaned without affecting its surface characteristics; the only product that can attack the tile panels is hydrofluoric acid.

WEAR RESISTANCE

Porcelain tile panels are highly scratch proof and resistant to deep abrasion. The properties of the tiles remain unchanged even after intensive use and frequent cleaning.

HIGH FLEXURAL STRENGTH

Porcelain tile panels have a high modulus of rupture. 3+ and 5.6 are both 50 MOR which are high values. Typical porcelain value is 35-37.

FROST RESISTANCE

Porcelain tile panels average water absorption is 0.1% therefore it is frost resistant and suitable for any weather condition.

FIRE RESISTANT

Porcelain tile panels do not contain organic material therefore it is resistant to fire and high temperatures.

CHROMATIC PROPERTIES

Porcelain tile panels does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colors remain stable.

GRAFFITI

Porcelain tile panels are a graffiti resistant ceramic surface; it is easy to clean and even the strongest paints can be removed.

Laminam by Crossville - I Naturali 5.6 Calacatta Oro Venato L6093 and Calacatta Venato Bookmatch L0318.1M3MBM

SUSTAINABLE

- The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere
- Laminam has led the way to a photovoltaic system being installed on the roofs of its two Fiorano Modenese plants
- Over a year, this photovoltaic system guarantees the production of around 1,050 GWh, thereby enabling the company to produce 10% of its energy requirements
- In terms of CO2 reduction, Laminam's photovoltaic roof system eliminates the release of 525 tons of CO2 into the atmosphere annually
- Member of the Green Building Council Italia, this Italian association of manufacturing leaders strive to transform the building market towards environmental sustainability and to build livable communities. Partners of GBC Italia promote environmental, economic and social responsibility by innovating the way in which buildings are designed, built and used.

ENVIRONMENTAL STATEMENT

Laminam by Crossville collections are excellent choices for those seeking green surfacing solutions for design projects. These tile panels are responsibly made with natural raw materials in the heart of Italy's renowned tile production region. The panels are produced in one of the most advanced, environmentally sound manufacturing facilities in the world. Reflecting global standards in sustainability, the Laminam manufacturing process uses leading edge technology, recycling practices, and incorporates innovative methods to minimize waste and generate energy without depleting the earth's resources.

Created to meet Green Building Council standards, these panels support specifiers' goals for durable, healthy environments. The porcelain tile panels do not release emissions or substances into the environment. Manufacturing requires minimal maintenance, contributing to indoor air quality and providing ease of cleaning long term. The panels' superior performance characteristics lead to long product lifecycles—reducing the need for replacement. However, should panels need to be removed, they can simply be separated from their mesh, milled, and recycled back into the tile production stream.

As porcelain tile panels' popularity grows, the green innovations at the Laminam manufacturing facility advance, do as well. The plant's recently installed photovoltaic roof has already produced 1 GWh of energy and is capable of generating an estimated 1.387 GWh within a year. This will cut CO2 emissions into the atmosphere by 617 tons and empower the Laminam plant to self-generate 15% of its energy requirements.

Distributed exclusively in the U.S. by Crossville, many Laminam porcelain tile panel collections are stocked on American soil. This not only allows for prompt order fulfillment, but it also aids in minimizing fuel and energy consumption related to international shipping and transportation.

Gauged Porcelain Tile Panels
Beauty is beyond limitations.

Sample Express

Order your samples quickly and easily online at CrossvilleInc.com

We offer a variety of sizes and shipping options to satisfy your project needs.

You may also place sample orders through your Crossville representative, by emailing **Samples@CrossvilleInc.com** or calling **800.221.9093**

CrossvilleInc.com

If you want a better idea of what Crossville® tile would look like in a particular room setting, visit our website at CrossvilleInc.com and try Cross-Vision®. This powerful software tool allows you to visualize different types of Crossville tile in kitchens, bathrooms, dining rooms, and other living areas. In addition, our website features comprehensive information about Crossville's entire portfolio of products, including tile, trim, borders, and accents.

You can also download detailed care and maintenance instructions for our various products, or browse electronic versions of Crossville's product brochures. So whether you need information about Crossville products or tile in general, please visit us at **CrossvilleInc.com**.
