**Shade & Texture Index**

Reclamation has a shade variation of V4.

- **V1 Uniform appearance**
- **V2 Slight Variation**
- **V3 Moderate Variation**
- **V4 Substantial Variation**

This porcelain tile product is produced with a V4 variation. Inspect the product upon delivery and for best results, blend tile from several cartons during installation.

---

**Features and Benefits**

Created with digital production technology

- Cross-Sheen® finish for easy cleaning (available on UPS only)
- A mix of wood and concrete looks
- All sizes rectified and modular with a minimum 3mm grout joint

---

**Get Planked!**

Our Porcelain Stone® products are available in popular plank shapes with no minimum order and quick fulfillment.

See website for more details and sizes.
Reclamation

Recommended Use

Reclamation is recommended for interior floors, walls, countertops, and exterior walls in both residential and commercial applications. Reclamation is not recommended for exterior horizontal surfaces or exterior paving. If offset pattern is required for tiles 18 inches or longer, Crossville® recommends an offset of not greater than 33%. If an offset greater than 33% is specified, specifier and owner must approve mock-up and lippage. See CrossvilleInc.com for detailed installation instructions.

Care and Maintenance

Regular cleaning is the best way to keep Reclamation tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

Product Variation

This product is manufactured as 24 x 24, with a mix of wood and concrete looks. The 12 x 24 size is cut from the larger format therefore increasing the variation. Etchings shown are cut from 3 different large designs, resulting in a random visual. Individual pattern/graphics may not be specified.

EcoCycle Tile Process™

Reclamation contains a minimum of 4 percent pre-consumer recycled content and is manufactured by Crossville® using processes that recycle nearly 12 million pounds of previously discarded filtrate and fired tile waste. In addition to its own fired waste recycling, Crossville also accepts and recycles reclaimed, previously installed tile through its Tile Take-Back® Program. For more information, visit CrossvilleInc.com/green.

Green Squared™ Certified

Crossville® has earned Green Squared™ certification from the Tile Council of North America (TCNA) for its entire U.S.-manufactured porcelain product line-up, as well as its manufacturing processes. The company is among the first ever recipients of this certification standard for the tile industry. TCNA developed the Green Squared certification under American National Standards Institute (ANSI) process. The multi-attribute program (ANSI A138.1) scores products in five categories of performance: product characteristics, manufacturing, corporate governance, innovation and end-of-life. Crossville’s certified products and processes received stringent evaluation from Scientific Certification Systems (SCS), the green building industry’s longest standing third-party certifier.

Hydrotect

Our porcelain tiles are available with Hydrotect®. Crossville’s revolutionary invisible coating harnesses the power of light, water, and oxygen to create the best defense against dirt and pollution. Whether indoors or out, floors and walls stay cleaner, providing a superior experience in any space. For complete details check our website at CrossvilleInc.com.

National Accounts

For over 20 years we have been offering Porcelain tile to commercial customers at National Accounts pricing programs with special discounts. The National Accounts department provides materials forecasting, sales support and samples.

Exterior Cladding

Crossville’s Porcelain Stone® Exterior Cladding Systems are suitable for virtually any conventional masonry application. When used in conjunction with our exterior cladding systems, Crossville’s Porcelain Stone offers clear advantages: decreased construction costs, less site disturbance, low-to-zero maintenance after installation, accelerated construction schedules and greater strength than traditional masonry.
